

RE-STEEL

Supplier of Aerospace and Electronic Alloys

FOR 15 YEARS, RE-STEEL SUPPLY COMPANY, INC. HAS SERVICED THE SPECIALTY STEEL INDUSTRY.

The premier supplier of Invar plate for tooling applications to the aerospace composite structure industry, Re-Steel has built their standards on a unique model that puts customers at the center of their business. ▶

RE-STEEL OFFERS THE HIGHEST QUALITY MATERIALS AT THE LOWEST MARKET PRICE.

COST ADVANTAGE

More than a mill or steel service center, Re-Steel Supply Company is an independent, non-integrated producer of nickel alloy plate. This multi-functionality enables them to beat their competition by delivering significant cost advantage. And with the lower costs, Re-Steel Supply Company, Inc. is able to extend this savings directly to you – the customer.

DELIVERY

Re-Steel knows that your business depends on keeping costs low and completing projects on-time. To help meet your goals, rather than purchase finished plate from the mills as other metal service centers do, Re-Steel purchases semi-finished slabs and ingots from mills around the world. Excess rolling capacity is then used to convert the reheated slabs into finished plates. ▶

Poised to deliver worldwide, Re-Steel stocks several million pounds of nickel alloy plate products available for immediate delivery. Logistical teams based in Denver, Colorado ensure timely and economical delivery on a global scale. For more information about international sales, contact sales@re-steel.com or call 800-691-9053.

RE-STEEL SUPPLY COMPANY OFFERS THE SHORTEST LEAD TIME IN THE INDUSTRY.

ANYWHERE. ▶

RELIABLE AND PRECISE. RE-STEEL'S PROMISE. ▶

ADDITIONAL SERVICES

Because Re-Steel Supply Company, Inc. is more than just a steel mill, many additional services are available. For additional details, and a time and cost estimate on any of these services, contact the sales force at sales@resteel.com or call 800-691-9053.

Custom plate sizes rolled to exact dimensions. Design engineers, estimators and procurement personnel can achieve better yields to help reduce material costs.

A wide range of processing capabilities. Designers can choose what method they prefer when processing material including water jet cutting, plasma burning, and laser cutting.

Square tubing, angles and bars. Custom shapes can be custom manufactured to meet exact requirements.

Welding wire. We stock a wide array of chemistries and sizes to compliment our plate products.

Cost advantage, knowledgeable employees and unmatched in-house plate processing capabilities, makes Re-Steel Supply Company, Inc. the number one choice for Invar plate products. ▶
